

3/8"

T145 Solid Core HP Laminate Tops, 3/8"

The Blue Glass Café, John Hancock Building, Boston, MA

Elkus Manfredi, Architects

The architects selected Aceray's thin, knife edge, solid core laminate tops and the Piazza Stainless Steel bases for the clean simplicity of their design. The Piazza base uses a flat stainless steel spider to attach to the top, which also looks good when viewed from below.

Piazza Stainless Steel Table Base, square column and base, simple stainless steel spider.
